

EXAMELIA (Oct. 9-1942)

Q. Have you any recommendations or suggestions to offer?

A. Some of them like these nets. I just don't like them. They weight you down. They would sink. If they were covered with heavy wood and swung over the side they floated.

Is there any way you could release boats quicker. The forward end of the boat, I don't know it must have got jammed. I recommend some kind of releasing gear fitted in the boats. Something that would get them off easy.
