1. Information was received by this unit from the Local Intelligence Office of the United States Army, that a number of Javanese crew members aboard the subject Dutch Merchantman possess watermarked United States Coast Guard Captain Of The Port Identification Cards. Examination of the cards by Intelligence Officers reveal that the thumb print on each card is identical, and does not match the print of any member of the crew.
2. This is forwarded to Headquarters for information and any action deemed necessary.
3. Information available at this port indicates the vessel is now bound for San Francisco.
